Uncle Sam Says

Graduation days are over and the hopes of those leaving school for the last time are flying high. There is one bit of advice your Uncle Sam wants you graduates to remember, and that is—"the only money you'll ever have is the money you are saving right now. Saving part of each pay-check is the ONLY way to save." And one of the best ways to do it is to buy U. S. Savings Bonds through your company's Payroll Savings Plan. Those Bonds are backed by the full resources of the Government and will return you $4 for every $3 ten years later.
U. S. Treasury Department

IN MEMORIAM:
GOWIN—In loving memory of P. A. Gowin, who died July 27, 1947.
A wonderful father and grand daddy and aid;
One who was better, God never made.
A wonderful worker, as loyal and true,
One in a million, that father was you.
—Lily Mae Sed by daughter, Mrs. Wesley Stanley and Children.
(7-27-1tp)

CARD OF THANKS:
We wish to thank our many friends and neighbors for the kind deeds, the nice cards, flowers and visits during our recent illness in the hospital and at home.
—Mr. and Mrs. C. Roland Smith.

IN MEMORIAM:
In loving remembrance of Mr. W. H. Ayers, who departed this life 2 years ago today, July 30, 1948.
Just two years ago today,
God called my Dad away;
Out of his suffering into Thy rest;
It's hard to see but God knows best.
I've missed you so much since you left me.
There's a place set apart in my heart,
That only God knows the sorrow,
That your departing brought.
I pray that someday we'll meet again
In that happy golden shore;
Where there'll be no pain, no tears, no suffering,
And we can dwell forever more.
—Sadly missed by his daughter, Mrs. Ned Burge.

Check Cows' Feet

Although one would hardly gather the impression from the Holstein cow (above), cows are like people in more ways than one—one sure one being that when their feet hurt, their production lags. Farmers can help prevent loss of production from this source by periodic attention to the feet of their cattle to check for foot infection or other ills.

New Dairy Element Seen As Aid in More Output

The animal protein factor—miraculous dairy element which speeds up the growth of farm animals and poultry at less cost to the farmer—is now in tonnage production and should be readily available to consumers within a short time.

Officials of the chemical company producing the element which is accomplished by bacterial fermentation, promise feed efficiency that will represent a significant new advance in animal nutrition.

The fermentation APF, as the feed component is known, has a Vitamin B12 content approximately 40 times that of good fish meal, the outstanding natural source of APF which has been widely used heretofore in feed mixtures. This vitamin compound is one of the most effective known for supplementing chicken and hog feeds.
